

The Healthy Hydration Company™

Nestlé Waters and Project WET sign new 4-year partnership and come together again globally for World Water Day on March 22nd, 2015.

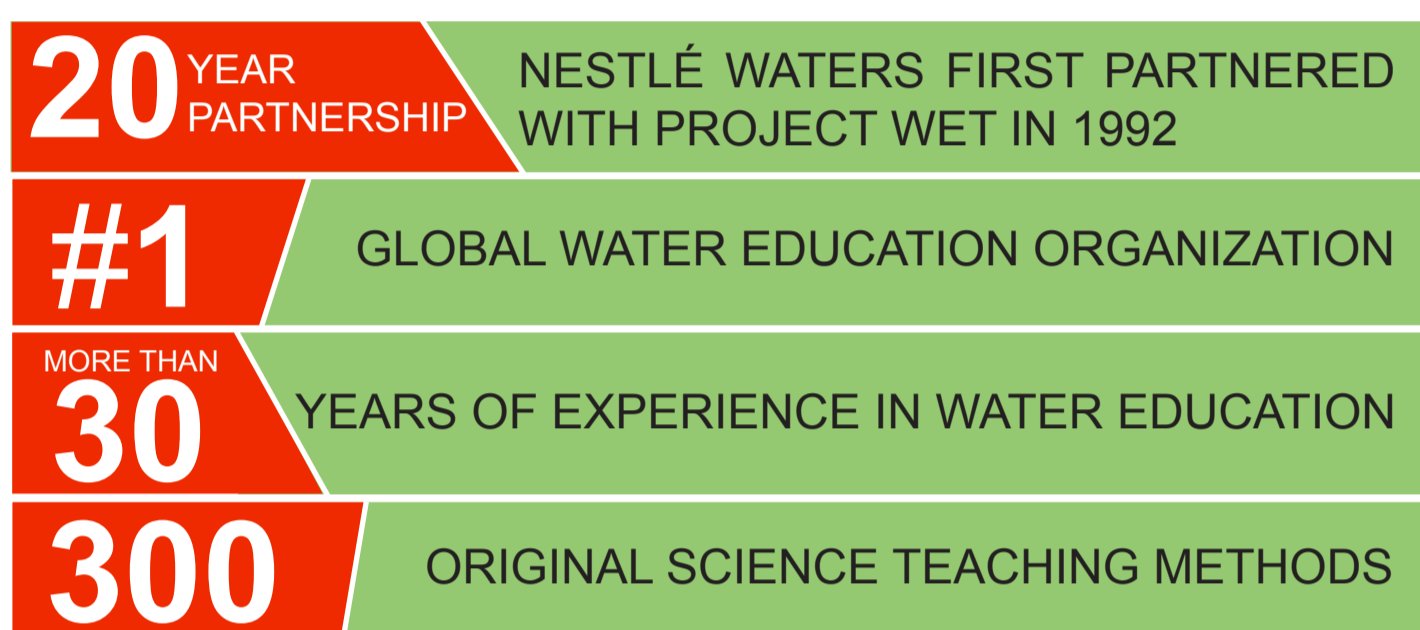

Paris, March 16th 2015 - World Water Day, organized each year on March 22nd by the United Nations, provides an opportunity for Nestlé Waters and Project WET (Water Education for Teachers) to raise awareness about the importance of water conservation and hydration.

PROJECT WET

Nestlé Waters and the non-governmental organization, Project WET have renewed their global partnership facilitating the continued expansion of water education amongst educators and children around the world for another four years.

“Two decades of support from Nestlé Waters have enabled Project WET to bring hands-on, action-oriented water education to people in places that we could not have reached on our own. We are eager to continue to expand the scope of our work with Nestlé Waters in this renewed partnership” says Dennis Nelson, President and CEO of Project WET Foundation.

Project WET is a US-based NGO that develops educational tools to increase water literacy around the world amongst educators and children.
